We received a request for further information dated April 6, 2015 from Laura Sinram relative to our amended year-end report (11/25/2014 - 12/31/2014), received 03/27/2015. A response to the request is due today, 05/11/2015.

As we investigated the problems, it became apparent that the discrepancies noted in the request for further information arose from software problems connected with our transition from NGP Classic to the new version of NGP between the time when the original report and the amended report were filed. I referred the matter to NGP, and their engineers are working to solve the problem, but as of yet, they have not come up with a solution. As a result I am unable to file an amended report that fixes the problem at this time. As soon as NGP has resolved the problem, I will file the amended report.
